

Water Savings Report

For the month of May 30 - June 30, 2016

	Total usage for the Month	<u>31,867</u>	gallons	
Anticipated usage on a traditional 3 day per week schedule		<u>57,200</u>	<u>120,000</u>	<u>114,400</u>
	Total Gallons Saved	<u>25,333</u>	Y.T.D.	<u>62,492</u>
	% Saved	<u>44.29%</u>	Y.T.D.	<u>54.63%</u>
\$ Saved at	<u>5.34</u> /1000 gal	<u>\$135.28</u>	Y.T.D.	<u>\$333.71</u>

Notes:

June dried down fast and got hot very quickly. This caused quite a bit of shock at the first part of the month on the new plants and sod. Everything is starting to adjust to the heat and we are seeing the moisture sensors holding water off in the beds when there is adequate moisture. We would anticipate a similar schedule to this for July.
